

G. Ramón García Ayala

17-04-2001
Mexican

Spanish (Ntv.)
English (B2)

Architect with a strong foundation in computational design and digital fabrication. Passionate about integrating cutting-edge tools into architectural design. Ramón seeks to join forward-thinking architecture teams driving innovation, sustainability, and experimentation in the built environment.

+++ Rhinoceros
++ Autodesk Revit
++ Adobe Photoshop
++ Grasshopper
+ AutoCAD
+ D5 Render
+ Sketchup
± Python Script

Digital and Analogous Tools

+++ Generative AI
++ Photogrammetry
+ Laser Cut
+ 3D Printing
+ CNC
± VR & AR

Work Experience

2025-P.
Research Lead [↗](#)
Research Project.io

Contribute to an independent research and consulting practice focused on the intersection of architecture, biology, and digital fabrication. Support project development through design research, strategic consulting, and prototyping. Explore experimental workflows that combine data-driven design with material experimentation and environmental systems.

2024-P.
Co-Founder Architect [↗](#)
Koral Studio

Lead a collaborative design practice focused on sustainable architecture across multiple scales. Develop strategies such as spatial reuse, passive systems, and energy efficiency to reduce long-term client costs. Apply computational tools at early design stages to optimize spatial logic and environmental performance. Also engage in international competitions for experimentation and growth.

2023-25
Research Project Lead [↗](#)
EAAD, Tecnológico de Monterrey

Directed to research projects within the School of Architecture, Art and Design with a focus on technology, design innovation, and experimental workflows. Explored applications of computational design, AI, and photogrammetry in architectural processes. Supported academic publications and prototyping efforts through analytical tools and emerging digital methods.

2024
Architectural Design Intern [↗](#)
Estudio 3.14

Collaborated on architecture and urban design projects for Grupo DMI. Used parametric tools to develop rapid design iterations and spatial simulations that informed early-stage concepts. Delivered clear 2D/3D outputs and contributed impactful ideas aligned with project needs and studio standards.

2021-2022
RISE: Patrimonio en Ascenso
Site Supervisor

Oversaw construction for residential and mixed-use projects, ensuring design execution, contractor coordination, and quality control on-site. Gained hands-on experience with construction processes, technical details, and team management at early stages of professional development.

Education

2025-26
Master in Advanced Computation for Architecture & Design [↗](#)
IAAC / Institute of Advanced Architecture of Catalonia

2020-24
Bachelor Degree in Architecture [↗](#)
TEC / Tecnológico de Monterrey

2023
Advanced Architecture Minor [↗](#)
TEC / Tecnológico de Monterrey

2017-20
Preparatory Studies in Humanities and Arts [↗](#)
Cumbres International School, San Javier

Academic Experience

2024
International Project Developement [↗](#)
Biennale College Architettura, 19th Biennale di Venezia

2024
Parametric Designer and Manufacturer [↗](#)
TEC's Mextrópoli Pavillion "Oblicuo" 2024

2024
Advanced Architecture & Digital Fabrication Workshops [↗](#)
University at Buffalo, New York

2022-24
Digital Design Workshop Instructor & Jury [↗](#)
EAAD, Tecnológico de Monterrey

2023
Main Piece Manufacturer [↗](#)
Cuatros Arquitectos del Tesino Exhibition

2023
Constructor and Manufacturer [↗](#)
TEC's Mextrópoli Pavillion "Tlalocán", 2023
